

**Nesty**

**BizzNest**

**Automated  
Stock Control  
Systems**

**Nesty supplies Automated Dispensing, Smart Lockers, and Click & Collect Systems to manage Consumable Vending of Non-Food Products**

**Our machines can be utilised for Stock Control, Dispensing IT or Medical Consumables, Tools or High Value Equipment, plus Intake of Returns**

**Systems can also be used by customers to pick-up and return keys for Car Hire or Hotel Rooms 24/7**

## **Benefits**

Nesty systems are configured to meet the specific needs of your business, increasing efficiencies, saving time and money

We can sync our systems with company software, to enable the use of staff ID cards. Electronic / cash payments can also be made

**BizzNest** solutions are flexible and future-proof. The modular hardware is easy to expand so it can grow with your business

**BizzNest** gives you a controlled, highly efficient method of distributing consumable supplies or goods to staff and customers

Systems can be placed indoors or outdoors under shelter. Vinyl wrap option to display machines in your company brand

## Click & Collect Facility

Staff who need Parts or Stock items message their support desk by App or Email

Support workers place the requested items in a locker and send a code back confirming their item is ready for collection and where to collect it from

When the items are needed the code is inputted into the machine and the locker opens

Items can be collected long after support workers have left for the night or the weekend

Staff can also leave items in a locker to be collected by support staff, by following on-screen instructions

# BizzNest

## For Offices, Factories, Hire Companies, Industrial & Construction Sites

### Nesty Advantages

Prevent theft, loss or waste, as well as over-stocking of low usage items

Systems can be placed close to workstations to save employees time

Remotely Monitor stock levels and manage employee access to items

Real-time insight on Stock Usage and Consumption per employee

Accurate Stock Management enables just-in-time ordering

Low stock level alerts are sent out automatically to designated phone / PC

All Nesty systems are modular and can be expanded at any time

### Smart Systems

The Nesty Flexx is equipped with a smart pusher system, which can smoothly dispense a wide range of products – even glass or breakable parts

The Flexx and Smart Locker systems can be equipped with employee ID verification and / or payment systems

Enable individual employees to access some or all products, and block others temporarily or permanently

# BizzNest - Dispensing

## Automated Warehouse

**BizzNest** is an intelligent Automated Warehouse for dispensing and returning products such as Uniforms, Tools, or other high value equipment

Items are dispensed by a pusher system allowing for even very small, or thin products such as SIM cards or batteries to be quickly issued

Products are moved to the collection area by a robotic lift that smoothly transfers items from the shelf, making them suitable for working with all manner of fragile objects

A Smart Locker system can control up to 512 locker units, with a choice of 13 different sized lockers, which come with either solid or glass fronted doors

## Equipment Dispensing

**BizzNest** is a modern, flexible solution to quickly provide staff with the tools or equipment they want, when they need it

Prevent theft and loss of valuable equipment by having staff scan their ID cards when taking products to use

The locker system gives employers and employees a secure pick-up and drop-off location for device exchange, repair, or replacement

## User Friendly Graphic Interface Operated by HD Touchscreen or App

**Product grid** - Up to 16 items can be visible at a time, scroll to see more items. The display order on the screen can be remotely changed at any time

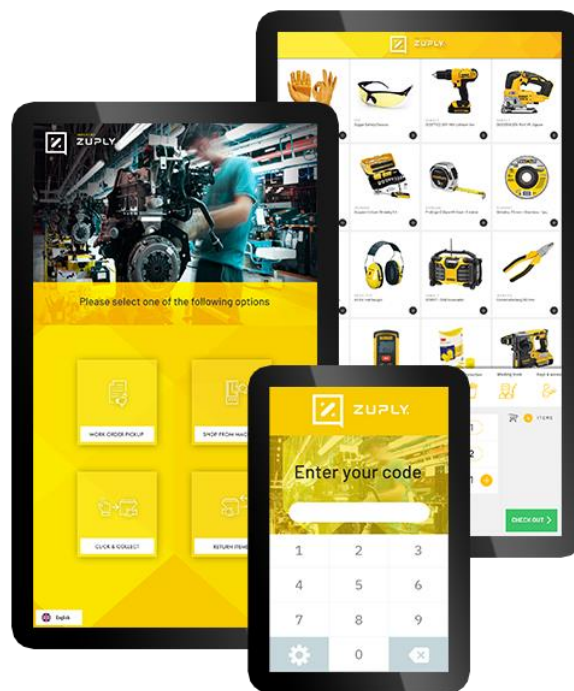

**Categories** – Place goods into six different categories. Users can quickly browse through the available products

**Product info** - Add text, specifications or photos to describe a product. Show videos about the safe use of items or to promote a company message

**Prices** - Create awareness among employees by showing product prices

**Shopping cart** - Selected items go into the shopping cart, and are dispensed after payment or scanning of ID badge

**Multilingual** - **BizzNest** can be set up to operate in multiple languages

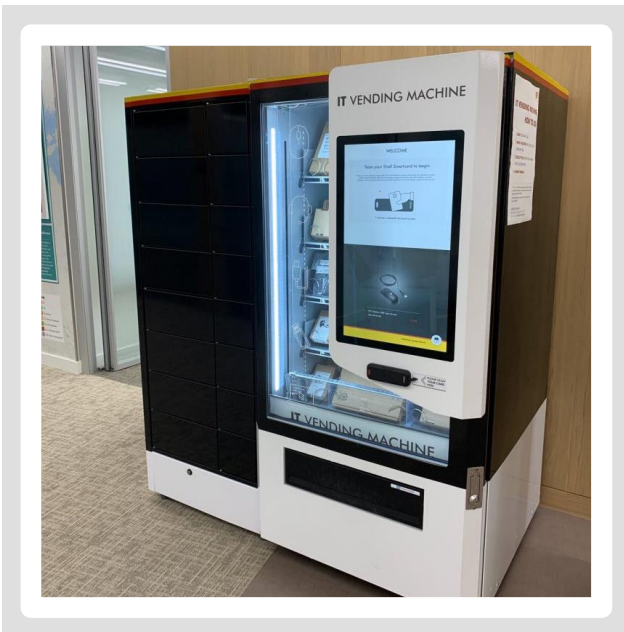

## BizzNest Flexx

The Flexx is equipped with a smart pusher system, which allows the dispensing of items from gloves to cables to keyboards

The Moove lift smoothly collects items and gently brings them to the collection point

The Flexx can dispense up to 60 different sized items

Product rental or Sign-out and returns can be easily managed with the Flexx, when combined with the Smart Locker system

## BizzNest Locker

Our BizzNest Smart Lockers work as stand alone, or can be expanded in conjunction with the Flexx unit to control from 8 to 512 lockers

Convenient and efficient system for the dispensing and returning of high value goods

Tool Hire & Return systems can be installed into secure shipping containers for construction site use. Easily Lift'n'Shift to new sites

We install, service and manage systems across Ireland and beyond

## Machine Access & Payment Systems

Access can be given via a PIN code, ID card or QR / Barcode  
Combinations of these systems are available

Actively manage your employees consumption

**BizzNest** can accept cash and/or card pay systems  
and be integrated with company ID card systems

## Asset Finance & Service

90%+ finance is available subject to normal criteria

15 - 20 year lifespan - 100% Depreciable over 8 Years

Complete Service Solution including Installation & Training

Full After-sales Support by our Nationwide Service Team
