

CareNest

Nesty

Automated Dispensing Solutions for Care Facilities

Nesty supplies smart dispensing and intake systems for use in distributing PPE, Uniforms, Stock, Tools and Health & Safety equipment.

Our machines can also be utilised for dispensing Medical Aids and Controlled Medicines, generating savings in consumption and staffing costs.

Benefits

All Nesty systems are incredibly flexible in their internal configuration, and being modular, can adapt to the changing needs of your organization.

Link the system to your existing software, enabling the integration of company ID cards and the ordering of items by app.

Payment can be processed by Cards, QR codes, Bar Code, or Cash if required.

CareNest gives you a safe, secure & touch-free method of distributing care supplies & medication 24 hours a day

Systems can be placed indoors or outdoors under shelter. Provide a 24-hour Pharmacy with units built into wall space

CareNest

For PPE, Uniforms, Medicines Health & Safety Products

Nesty Advantages

- Prevent waste and unnecessary over-stocking
- Important items are always available to staff, visitors or residents
- Nesty systems can be placed close to workstations to save employees time
- Remotely Monitor stock levels and change display information
- Real-time insight on Stock usage & Monitor Consumption per employee
- Re-stocking Alerts are sent to your phone and PC
- All Nesty systems are modular and can be expanded at any time

Micro Retail

- Generate extra income
- Supply PPE to visitors
- Install before point of entry
- Front & back load options
- Operating 24/7
- Anti-Microbial Coating Option

Click & Collect

Medication orders or Prescriptions can be placed with the Pharmacist by App or Email

The Pharmacist places the requested items in a locker and sends a code back that will only unlock the specific, numbered locker

When the items are needed the code is inputted into the machine and the locker opens

Items can be collected long after the Pharmacist has left for the night or the weekend

Items not required remain securely locked away until the Pharmacist retrieves them

Nesty

Pharmacy Dispensary

In 2015 Tallaght Hospital trialed a pharmacist working as an integrated part of the team managing medications and concluded:

An Automated Dispensing System will help them improve patient care / safety in the Pharmacy dept, particularly in Clinical Pharmacy Services and the key benefits of doing this would be:

- a) Avoid the need to employ 3 FTE Pharmacists and Pharmaceutical Technicians
- b) Release 1 FTE Pharmacist currently rostered in the Dispensary for clinical work
- c) Reduce the need for a capital building project to further expand the Pharmacy department to meet space and staffing requirements
- d) Improved service to nursing staff on wards through the expansion of the Ward Based Technician Service, in particular easier drug administration rounds
- e) Deliver a 60% reduction in dispensary errors

CareNest Flexx

Stand alone Micro Retail Units can be placed in satellite locations and filled with the most popular items.

The CareNest Flexx is equipped with a smart pusher system, which allows the dispensing of dozens of products.

The machines are very flexible in their internal configuration options, and can dispense up to 60 different sized items.

CareNest Locker

Our CareNest locker solution is stand alone or can expand in conjunction with the Flexx unit.

Highly efficient management system for Stock, Tools, PPE and IT consumables.

Ideal for dispensing and taking in loan items, with optional barcode scanner.

Choice of 13 different locker sizes

All Nesty systems can be operated with a HD touchscreen.

Product grid - On the 22" HD touch-screen, 16 items can be displayed at a time, just scroll to see more items. Remotely set and change the display order

Categories - Place goods into six different categories. Users can quickly browse through the available products

Product info - Add text, specifications or photos to describe a product more effectively. Show videos about the use of items or to promote your business

Prices - Create awareness among employees by displaying product prices

Shopping cart - Selected items go into the shopping cart and are dispensed after electronic payment or scanning ID badge

Multilingual - **CareNest** can be set up to operate in multiple languages, enabling all employees and / or users to easily operate the machines

Machine Access & Payment

Access can be given via a PIN code, ID card or QR / Barcode. Combinations of these systems are also possible. In Nesty Web you can manage your employees, with options to show or hide selected products for each employee.

CareNest can have cash or cashless payment systems. Either option can also be combined with ID verification.
