

MSK + E-S Plus

State-of-the-art
technology
& traditional vending

TECHNOLOGICAL INNOVATION

Nesty has joined together smart kiosk technology to traditional vending systems to offer new smart unattended sales solutions in industries such as restaurants, recreational or retail facilities, etc. This provides a much more interactive and dynamic purchasing experience.

The MSK model guarantees an optimal management of any point of sale and allows a comprehensive control of all the products and its prices, stocks and loyalty. Designed as a selection and prepay system, it features a 27" Full HD touchscreen, an innovative coin mechanism with external recovery motor and it is fitted to equip any payment system (including banknote return), loyalty card readers, up-sale system.

The MSK model can manage up to four vending machines, so it is the perfect complement for the Vision E-S Plus machine, a module that allows selling large products, such as tools, large electronic devices, as well as food items, among others. It significantly increases the number of channels and the storage capacity compared to other machines in the same product range.

VISION E-S PLUS MAIN FEATURES

- Capacity for up to 8 height-adjustable trays with up to 10 channels each.
- FIFO system. Continues renewal with the freshest product.
- Correct sale detection with photocells.
